# Contents

# Executive Summary

DOLPHIN is a community-driven digital asset built on the Base Network with a strong emphasis on transparency, security, governance and long-term sustainability.

The project was designed to address common concerns within the meme token sector, including centralized ownership, unlocked liquidity, unclear token allocations and insufficient project documentation.

DOLPHIN combines Safe Multisig governance, locked liquidity, verified contracts, a transparent tokenomics model, vesting controls and community-supported burn initiatives to create a more accountable ecosystem for long-term participants.

### Core Principles

Security first
Transparent allocation
Community growth
Long-term sustainability

### Current Highlights

Safe Multisig 3/3
LP locked until 2028
55M burned supply
0% buy and sell tax

# Market Background

The meme token sector has become one of the most active and community-driven areas of the cryptocurrency market. However, rapid launches and speculative activity have also created recurring challenges for investors.

Common issues include hidden ownership control, unlocked liquidity, excessive taxation, unverified contracts and unclear project allocation models. DOLPHIN was created with these lessons in mind and focuses on public verification, locked liquidity, clear tokenomics and governance that avoids dependence on a single wallet.

### Transparency

Contracts, tokenomics and governance actions are documented.

### Security

Safe Multisig ownership and LP lock reduce key risks.

### Sustainability

Vesting and burns support long-term discipline.

# Vision and Mission

### Vision

To become one of the most trusted and transparent community-driven projects within the Base ecosystem.

### Mission

DOLPHIN aims to build a sustainable community ecosystem supported by secure governance, responsible token management, verified infrastructure and continuous community participation.

Mission pillars:

- Protect participants through transparent governance and verifiable on-chain actions.
- Maintain a long-term sustainability model through vesting and burn strategies.
- Encourage community participation and feedback in major project decisions.
- Build a recognizable ecosystem around the DOLPHIN brand on Base.

# Why DOLPHIN

DOLPHIN differentiates itself by combining the accessibility of a community token with security practices usually expected from more mature projects. The project's key strengths are based on verifiable on-chain actions.

### Safe Multisig

Critical administrative permissions require 3-of-3 confirmations.

### Liquidity Lock

LP is locked until June 13, 2028.

### Verified Contracts

Token and vesting contracts are publicly verifiable.

### Transparent Tokenomics

Allocations, vesting, burn reserve and supply events are documented.

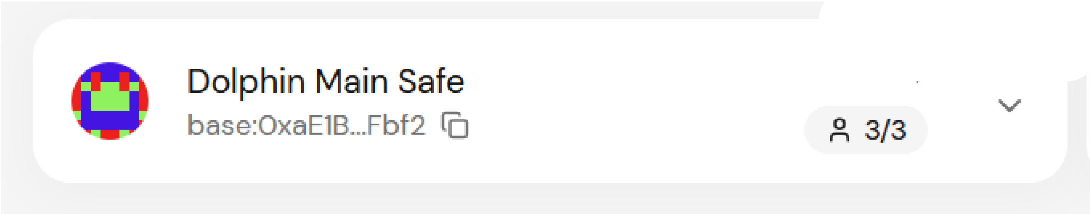
# Security Architecture

DOLPHIN's security framework focuses on reducing single-party control, increasing public verifiability and limiting common smart contract risks.

| Security Feature | Status |
|---|---|
| Safe Multisig Governance | Enabled - 3/3 |
| Liquidity Lock | Until 13 Jun 2028 |
| Token Contract | Verified |
| Vesting Contract | Verified |
| Mint Function | Not present |
| Blacklist Function | Not present |
| Max Wallet Restriction | Not present |
| Max Transaction Restriction | Not present |
| Current Buy Tax | 0% |
| Current Sell Tax | 0% |

These controls do not eliminate market risk, but they materially improve transparency and reduce several common project-level risks seen in early-stage tokens.

# Safe Multisig Governance



Ownership of the DOLPHIN smart contract has been transferred from the deployer wallet to a Safe Multisig wallet. The Safe requires 3-of-3 confirmations for critical actions, which means no single participant can independently execute owner-level contract operations.

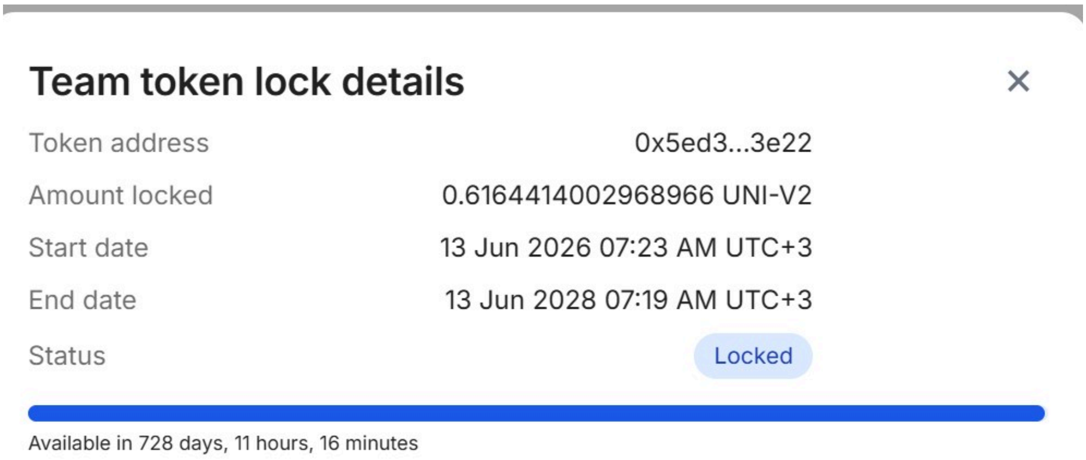
### Safe Multisig Address

0xaE1B8995D651B2929FC8D8B9929308bf37D1Fbf2

### Ownership Transfer Transaction

0xb0f9a29b9eaa8d53dc60ce329b3734186ad6f4bdd566a1d40fb0067a79c7db9f

# Liquidity Protection



DOLPHIN's liquidity pool has been locked until June 13, 2028. A liquidity lock reduces the risk of sudden liquidity withdrawal and demonstrates long-term commitment to the project ecosystem.

### LP Lock Status

Locked until June 13, 2028

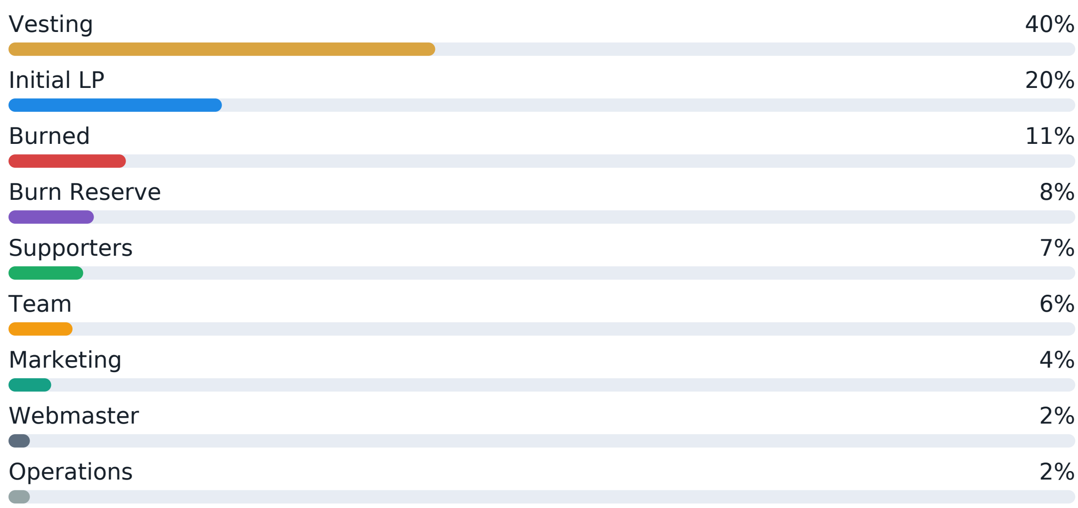
### Initial Liquidity Allocation

100,000,000 DOLPHIN

# Tokenomics

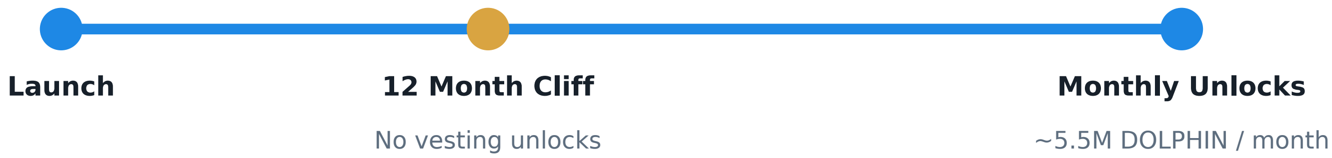
## Total Supply: 499,999,999 DOLPHIN

| Allocation | Tokens | Share |
|---|---|---|
| Locked Vesting | 200,000,000 | 40% |
| Initial LP | 100,000,000 | 20% |
| Burned Supply | 55,000,000 | 11% |
| Burn Reserve | 40,000,000 | 8% |
| Supporters | 35,000,000 | 7% |
| Team | 30,000,000 | 6% |
| Marketing | 20,000,000 | 4% |
| Webmaster | 10,000,000 | 2% |
| Operations Reserve | 9,999,999 | 2% |



# Vesting System

A total of 200,000,000 DOLPHIN is secured through a verified vesting contract. No vesting tokens are released during the first 12 months. After the cliff period, approximately 5.5 million DOLPHIN unlock monthly.



### Vesting Contract

0x5F11428fEe257635A58ea5041688599689aEE123

# Burn Strategy

Supply reduction is a key component of DOLPHIN's long-term strategy. As of this whitepaper version, 55,000,000 DOLPHIN have been permanently removed from circulation, while 40,000,000 DOLPHIN remain in the burn reserve.

### Burned Supply

55,000,000 DOLPHIN
11% of supply

### Burn Reserve

40,000,000 DOLPHIN
8% of supply

### Supply Discipline

Burn events are public and traceable on-chain.

### 50M Burn Transaction

0xdc8cb6234cd738bab15c0d9063715d58d61932b96dd50d75ac8574536b0a1ef8

# Governance and Tax Policy

DOLPHIN is managed by a core team and community contributors. Critical permissions are protected by Safe Multisig governance. Community feedback is considered for major operational and economic decisions.

### Current Buy Tax

0%

### Current Sell Tax

0%

Future fee adjustments, if any, may be proposed and discussed with the community to support liquidity growth, ecosystem development and long-term sustainability.

# Roadmap

### Phase 1

Token launch, liquidity creation, contract verification, community formation

### Phase 2

Liquidity lock, Safe Multisig ownership transfer, burn events, holder growth

### Phase 3

BaseScan token info update, CoinGecko listing, CoinMarketCap application

### Phase 4

Partnership development, ecosystem growth, community governance expansion
